

TO & E

IJN AUXILIARY PLATOON

Following their successful break with Imperial Japan, the Imperial Japanese Navy has rapidly expanded their sphere of influence not only across the Pacific, but into the Middle East as well. The technologies acquired from the Axis forces over the preceding years have catapulted the IJN's own scientific breakthroughs to heights previously unheard of in such a short span of time.

With their borders at home mostly secured from within, the IJN now seeks to solidify its position on the world stage.

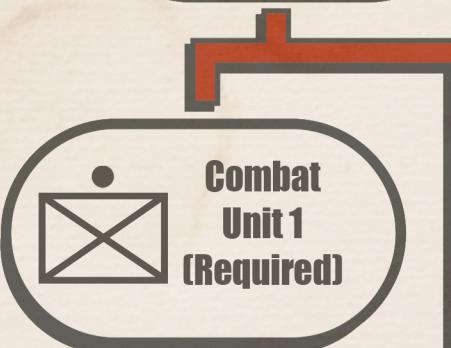

PLATOON ADVANTAGE: RAIN OF FIRE

With her combat training in Babylon completed, Yukiko has taken on a more direct role in the ongoing training of the younger IJN Naval Cadets. The skills she learned while under the tutelage of the Axis forces will no doubt be highly valued by the IJN as they continue to expand their sphere of influence across the Pacific and beyond.

As long as Yukiko is on the table, all IJN Cadets in this platoon gain the Defensive Tactics skill.

SUPPORT UNITS

Make no mistake, Yukiko and her Auxiliary Platoon are a support platoon through and through. The Genbu Medium Walker is regularly called upon by Yukiko to provide rolling fields of smoke across the battlefield so that her platoon can be shielded from the eyes of their enemies. Additional IJN Cadet units can also be called upon to further bulk out the platoon when things become exceptionally difficult.
